

21st Century Community Learning Centers Program

21st CCLC Reviewer Scoring Report – Cohort 10

Applicant Name:	Training Center Incorporated
Proposal Ranking:	11
Average Score	117.2 / 125

Proposal Strengths:

- The Program Design portion of the narrative reflects carefully planning and attention to detail. The evaluation plan is thoroughly detailed and comprehensive in relation to program goals/objectives/outcomes and quality of actual services.
- Very strong evaluation and program implementation sections that outline the direct ways assessment will take place throughout the grant cycle.
- Extensive network of community partners shows broad community support for program and ensures program sustainability beyond the 21CCLC grant period.

Proposal Weaknesses:

- The professional development section of the application can be strengthened by including strategies to assess and address the individual needs of staff who provide direct services to students. The role of these staff is vital in providing direct services to students, but there is no evidence of training to address the quality of services beyond ensuring student safety and behavior management. These are essential/basic training for operation of the program and do not add to the quality of the services offered to participants.
- Outside of the section on volunteer recruitment where details were limited as to how the volunteers would be utilized to fulfill program expectations there are not very many areas of weakness within the application.
- Would have liked to have seen how many students the program will be serving per school, for example, would they have more participants from a particular school due to that school's greater overall need?

Top Areas Where Points Were Lost:

- Professional Development
- Program Design
- Need for Project
